Announcement of formation of integrated dental systems(ids)

Englewood Cliffs, NJ – (February 25, 2014) Founder and CEO, Carey Lyons, today announced the formation of integrated dental systems (ids) - the shared vision of a group of leaders in the dental industry. ids was formed to provide dentists and clinicians with a full suite of tooth replacement products and services that will help them grow their practices and achieve better outcomes for their patients.

ids's initial offerings will be the entire line of implant products and accessories from Megagen US, which ids acquired in the fall of 2013. These include the revolutionary AnyRidge®, AnyOne® and Rescue® Implant Systems. "Implants are now the largest dental products category with global sales of over \$4.2 billion annually, which translates into a tremendous opportunity for dentists currently performing implants and those looking to add implant surgery to their practices," stated CEO, Carey Lyons.

Megagen Implants was founded by Dr. K. B. Park in 2002 and is one of the fastest growing implant brands in the world. Started as an outgrowth of Dr. Park's renowned MIR Dental Network of 22 world class clinics, Megagen offers over 2,000 products. With more than 15,000 users worldwide and 3,000 in the USA, Megagen Implants are backed by years of successful procedures and a warranty unequalled in the industry. Developed by clinicians for clinicians, their innovative products have earned a global reputation for being tissue friendly, providing unsurpassed quality, faster and better osseointegration and the elimination of bone loss.

The ids management team includes David Singh, COO, and Steven Pfefer, Vice President of Sales. ids will also offer accredited continuing education support through its alliance with Vizstara – a dynamic clinical and teaching facility committed to all-around excellence in oral health. "Developing solutions that help dentists provide better outcomes is - and will remain - the focus of everything the organization does," added Lyons.

Headquartered in Englewood Cliffs, New Jersey, ids is supported by a sales team located throughout the United States.

About ids

Founded in 2013, ids provides a full suite of implant and related products that will offer dentists and their patients more options and better implant outcomes through innovative, patented, premium product designs that are backed by substantiated clinical research. Featured products include the Megagen AnyRidge and AnyOne Implant systems. For more information, visit www.idsmegagen.com
